Management to Provide Corporate Update on Key Milestones

MAYNARD, Mass., Sept. 07, 2022 (GLOBE NEWSWIRE) -- AquaBounty Technologies, Inc. (NASDAQ: AQB) ("AquaBounty" or the "Company"), a land-based aquaculture company utilizing technology to enhance productivity and sustainability, will host a virtual analyst day presentation at 12:00 p.m. Eastern time on Thursday, September 15, 2022.

AquaBounty Chief Executive Officer Sylvia Wulf and Chief Financial Officer David Frank will provide an update on progress towards new milestone achievements, including the scale-up of harvests at its Indiana farm and construction of its new Ohio farm. The Company also plans to discuss how its innovative land-based farms, combined with its expertise in genetic engineering, can be part of the solution to a rapidly increasing global demand for high-quality seafood.

"We look forward to providing our valued investors with a comprehensive corporate update as part of our virtual analyst day presentation," said Sylvia Wulf, Chief Executive Officer. "Our analyst day presentation and subsequent question and answer session will provide a unique forum for us to address the most pressing questions from the capital markets community."

About AquaBounty

At AquaBounty Technologies, Inc. (NASDAQ: AQB), we believe we are a leader in land-based aquaculture leveraging decades of technology expertise to deliver disruptive solutions that address food insecurity and climate change issues. We are committed to feeding the world efficiently, sustainably and profitably. AquaBounty provides fresh Atlantic salmon to nearby markets by raising its fish in carefully monitored land-based fish farms through a safe, secure and sustainable process. The Company's land-based Recirculating Aquaculture System ("RAS") farms, located in Indiana, United States and Prince Edward Island, Canada, are close to key consumption markets and are designed to prevent disease and to include multiple levels of fish containment to protect wild fish populations. AquaBounty is raising nutritious salmon that is free of antibiotics and contaminants and provides a solution resulting in a reduced carbon footprint and no risk of pollution to marine ecosystems as compared to traditional sea-cage farming.
