

AquaBounty Technologies, Inc. Results for the second quarter and first half ended June 30, 2017

August 4, 2017

MAYNARD, Mass, Aug. 04, 2017 (GLOBE NEWSWIRE) -- AquaBounty Technologies, Inc. (NASDAQ:AQB) ("AquaBounty" or the "Company"), a biotechnology company focused on enhancing productivity in the aquaculture market and a majority-owned subsidiary of Intrexon Corporation (NYSE:XON), announces the Company's financial results for the second quarter and first half ended June 30, 2017.

Financial and Operational Summary:

- Significant operational progress made in advancing the Company's commercial plans;
- Further to receiving regulatory approval from Health Canada and the Canadian Food Inspection Agency last year, sold approximately five tons of fresh AquAdvantage[®] Salmon fillets at market price to customers in Canada;
- Purchased certain assets of the Bell Fish Company LLC farm site in Albany, Indiana, for \$14.2 million, including legal and other transaction costs;
- Received provincial approval from the Prince Edward Island regulatory authorities to construct a broodstock facility and a grow-out facility on the Company's Rollo Bay site;
- Completed the de-listing of the Company's common shares from trading on AIM; and
- Net loss for the three-month period ended June 30, 2017, was relatively flat at \$2.1 million compared to the corresponding period of the previous year.

During the current quarter, the Company recognized \$53 thousand of revenue on sales of AquAdvantage Salmon fillets. Operating expenses were up slightly to \$2.1 million in the current period from \$2.0 million in the corresponding period of the previous year, primarily due to the increased costs associated with being a public company in the United States.

Ronald Stotish, Chief Executive Officer of AquaBounty, stated: "This quarter marked two milestone events for AquaBounty—the purchase of our first commercial farm site for the production of our eco-friendly AquAdvantage Salmon in the United States and the very first sales of AquAdvantage Salmon. The sale and discussions with potential buyers clearly demonstrate that customers want our fish, and we look forward to increasing our production capacity to meet demand."
