About AquaBounty

AquaBounty Technologies, Inc. is a publicly traded aquaculture company focused on improving productivity and sustainability in commercial aquaculture. The Company's AquAdvantage fish program is based upon a single, specific molecular modification in fish that results in more rapid growth in early development. With aquaculture facilities located in Prince Edward Island, Canada, and Indiana, USA, AquaBounty is raising its disease-free, antibiotic-free salmon in land-based recirculating aquaculture systems, offering a reduced carbon footprint and no risk of pollution of marine ecosystems as compared to traditional sea-cage farming.
